EXPERIENCE

ParshWebCraft

Jun 2026 – Present

Software Development Engineer (SDE-1) Intern

- Developed and deployed **10+ production-ready features** using ReactJS, NodeJS, ExpressJS, MongoDB, and REST APIs, enhancing functionality across client projects and SaaS platforms.
- Optimized REST APIs and MongoDB queries, improving application performance while integrating secure authentication, third-party APIs, and scalable backend services.
- Collaborated with cross-functional teams in an Agile environment using Git/GitHub to deliver **10+ production features**, perform code reviews, debugging, testing, and deployment of scalable web applications.

PROJECTS

Fact Knowledge Layer 📄 | Python, Flask, SQLite, LLMs, pdfplumber, TF-IDF

2026

- Built an LLM-powered document intelligence system that extracts **grounded atomic facts** from PDFs and automatically identifies **corroborations, contradictions, and contextual differences** across documents.
- Engineered a scalable comparison pipeline using **TF-IDF cosine similarity** for candidate pre-filtering, LLM-based relationship classification, and **verbatim evidence validation**, reducing unnecessary LLM comparisons while ensuring traceable results.

College Predictor 📄 | ReactJS, NodeJS, ExpressJS, MongoDB, TailwindCSS

2026

- Built an AI-powered college & branch recommendation engine for JEE aspirants, processing **10,000+ historical cutoff records** across NITs, IITs, and GFTIs to predict admission chances by rank and category.
- Engineered a MongoDB aggregation pipeline and RESTful API delivering real-time rank-based predictions in **under 1 second**, with a responsive React interface improving counseling accuracy for **500+ users**.

Station Guide 📄 | ReactJS, NodeJS, ExpressJS, MongoDB, TailwindCSS, Mapbox GL

2025

- Engineered a full-stack real-time station navigation platform using **ReactJS, NodeJS, ExpressJS, MongoDB, and Mapbox GL**, supporting **500+ map interactions** with **99.9% uptime**.
- Optimized **REST API** performance through MongoDB indexing and caching, reducing average API response time by **40%** and improving application scalability.
